DETAILED ACTION

Claim Objections

1. Claims 2, 3, 4, 5, 7, 10 and 11 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 2 teaches lignosulfonates, xanthan gums, amphoterics and hydroxyethylcellulose, claim 3 teaches activated charcoal, claim 4 teaches lignites containing calcium hydroxide, leonardite with potassium, leonardite with gyp and organophilic leonardite, claim 5 teaches lignosulfonates, claim 7 teaches organophilic clays and claim 10 teaches lignosulfonate and wood sugar, which are all not raw base materials as taught in applicants claim 1.

Claim 11, teaches that the base may be a mixture of 2 or more base materials, while claim 1 teaches that only one base material is present.

2. Claim 6 is objected to because of the following informalities: Claim 6 teaches "selected from the group consisting of asphalt", which is improper since no group is present. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 14 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 14, the teaching that the particles define an original particle size distribution and wherein the pellet body is further operable to revert to substantially the original particle size distribution of the plurality of untreated comminuted particles is not found in the specification, and is new matter.

5. Claims 1, 8, 9, 12 and 13 are allowable over the art of record.

6. Applicants amendment to claim 1, has overcome the art of record, distinguishing in that a the pellet has only one base material, and they begin to disperse into the plurality of particles, upon introduction into the drilling fluid. New objections are presented in view of applicants amendment. Applicant is reminded that all claims of record, including withdrawn and cancelled claims must have a status identifier when submitting a claim amendment.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
